

Epiform[®] POWDER FOR RUST PREVENTION / BINDER APPLICATION

Many Epiform[®] powder coatings are available, suitable for rust prevention for various metals/the binder resins for molding.

Features

1. Powder Coatings for Rust Prevention
 - Excellent in adhesion to various metals.
2. Powder Coatings for Binder Application
 - Excellent in adhesion to various powders.
3. Other Powder Coatings
 - Powder coatings are available with various properties such as flexibility and high thermal conductivity.

Product Line-Up and Properties

| Application | Properties | Product Name | Curing Condition (°C/mins) | Tg Temp | UL Approval |
|--------------------------------|-----------------------------|--------------|----------------------------|---------|--------------------|
| Rust Prevention/ Insulation | Uniformity coating | F-501 | 200/10 | 110 | Class B Equivalent |
| | Tracking Resistance | F-205 | 150/30 | 105 | Class B Equivalent |
| | Heat Resistance / Adhesion | F-6975 | 190/20 | 130 | Class F Equivalent |
| Binder | Rapid Cure | F-246 | 180/5 | 115 | Class B Equivalent |
| | Heat Resistance / High Flow | EPX-6136 | 200/60 | 140 | Class B Equivalent |
| Others | High Thermal Conductivity | F-316 | 150/30 | 110 | Class B Equivalent |
